3D printed, MCD/slide cover plate comparison (Installed)

3D printed, MCD installed on pistol

- * These MCDs, even taken alone, are machineguns as defined under Federal Law, and these devices are easily installed in semiautomatic firearms to create fully automatic weapons.
- * MCDs are currently being privately manufactured and sold online by various vendors. These illegally produced or imported devices are often marketed using the counterfeit identity of the firearms on which they are designed to be installed.

AR-type MCD on lug of
upper assembly

AR-type MCD installed
in fire control cavity

* AR-type MCDs, even taken alone, are machineguns as defined under federal law, and the installation of AR-type MCDs into semiautomatic, AR-type firearms, depending on the weapon configuration, will convert such firearms to function as an automatic weapon.
